

KSR COLLEGE OF EDUCATION

BEST PRACTICE- I

Title of the Practice: "Green House Campus"

Objectives of the Practice

The Green Campus initiative began with an objective of fostering a culture of eco-friendly practices and making the campus environmentally imperishable. We aim to build a campus that is plastic free, produces minimal waste, conserves energy, protects biodiversity and practices self-sustainability in areas of power, water and cleanliness.

The Practice

Infrastructural Practice

- While cutting trees on campus is strictly prohibited, KSR plants new trees each year and maintains a Green House.
- The campus is single-use plastic free.
- Tree plantation system is followed at the time of teaching practice in every school.
- Environment-friendly, energy-saving electrical appliances that reduce wasteful inefficiencies have been installed.
- The college uses solar energy and practices rain water harvesting.
- Waste water coming out of the Reverse Osmosis (RO) system is reused by channelizing this water to the washrooms.
- Green lawns and number of trees provides a pleasant atmosphere in the entire campus.
- Green house practices among the students free pollution & rendered fresh and clean air for breathing.
- The college infrastructure provides green and clean ventilation.
- College Campus is a very green campus housing a variety of plants and trees.
- Farewell time students are requested to present only trees as a token of love.
- Canteen neatness maintained by students alone to invoke among them cleanliness is next to godliness.

Context

Students have a mass clean up session on every day for making the institution clean and neat. These processes aim to make them respect their surroundings and refrain from making a mess as they will be the ones cleaning them. It also puts all students regardless of social status or wealth on an equal footing. For a long time it has been an important part of

our institutions to teach our students from young age, virtues such as cleaning up after themselves, discipline and sensitivity/responsibility about the surroundings to make the institution neat and greenish.

When such ideal practices are habituated the ideal root characters of the young minds are strengthened to become responsible citizens.

Challenges faced

To self motivate and the students to habituate the practice regularly are the only challenge that occurred.

Evidence of success

These kinds of habits have changed the way the students behave and move about. They are more conscious about their surroundings and maintain tidiness, which has in turn created good atmosphere.

BEST PRACTICE- II

All teaching and non-teaching staff, students is eligible for transport on the college bus. For other official purpose, the staff concerned should inform the Transport coordinator and in advance.

- The college offers free transport to all.
- Free transport facility makes among the students free mind to access the transport.
- Even poor students can utilize and benefitted the free bus facility.
